

Aniket saindankar

Detail-Oriented Data Analyst | Python (Pandas, NumPy) | SQL | Power BI | Machine Learning

India | [+91 8421206963](tel:+918421206963) | saindankaraniket@gmail.com | [GitHub](#) | LinkedIn: www.linkedin.com/in/aniket-saindankar

Summary

A certified Data Analyst with a strong foundation in data manipulation, statistical analysis, and visualization. Proficient in Python, SQL, and Power BI, with hands-on experience transforming complex datasets into actionable insights to drive data-informed decision-making. Eager to apply technical and analytical skills to solve challenging business problems.

Skills

Programming & Databases | Python (Pandas, NumPy) | SQL (MySQL, Oracle) | Excel (Advanced Formulas, PivotTables, Dashboards) | Visualization & BI Tools |Tableau | Power BI | Matplotlib | Seaborn | Machine Learning & Statistics | Linear & Logistic Regression | Hypothesis Testing | Natural Language Processing (NLP) Basics | Git/GitHub | Jupyter Notebook | GenAI Prompting | Apache Spark | Cloud AWS | Big Data | Hadoop

Education

International Institute of Information Technology (IIIT) , Bangalore
PG in Data Science, Machine learning & AI

Pad. Dr DY Patil Institute of Engineering, Management & Research.
Bachelor of Engineering

Projects

Bangalore Housing Price Analysis - Python (Pandas, NumPy, Seaborn)

- Performed Exploratory Data Analysis (EDA) on a dataset of 5,000+ housing records by cleaning data and handling missing values.
- Identified key price drivers, with location and number of BHKs accounting for the most significant variance in property value.
- Created visualizations to illustrate market trends, providing actionable insights for real-estate developer pricing strategies.

Delivery Time Prediction Model - Python (Scikit-learn)

- Engineered a linear regression model to predict delivery times for a logistics app, utilizing features like distance, order volume, and time of day.
- Improved model performance by applying log transformation and feature scaling, evaluating results using R², MAE, and RMSE metrics.
- The model provided a foundational tool for the company to optimize operational efficiency and resource allocation.

Experience

TCS (Via Forage)
Internship in Data Visualization

- Completed a job simulation focused on analyzing datasets and creating visualizations for a client scenario in the power and energy sector.
- Developed key questions for a strategic meeting with senior leadership to clarify data requirements and business objectives.
- Built and presented data visuals and a dashboard to help executives make effective, data-driven decisions regarding sustainability and operational performance.

Personal goal pursuit

- Qualified for the final interview round after clearing multiple rigorous preliminary stages, showcasing exceptional perseverance and depth of understanding.
- Developed advanced analytical and critical thinking skills by mastering a vast syllabus encompassing polity, economy, and current affairs.
- Cultivated strong self-discipline and systematic learning strategies through intensive, independent study.

Saideep Consultancy
Junior Engineer

- Collected and analyzed land survey data to assess project feasibility and support strategic planning.
- Automated the generation of measurement and project tracking reports using Excel, reducing manual reporting time by 15%.
- Created detailed client-facing reports using AutoCAD and Excel, improving communication and transparency on project progress.

Certifications

Generative AI Foundations Certificate | Excel- Exploratory Data Analysis | Python Bootcamp

UpGrad | Sep'25
